

Astronomy calling !!!

Why astronomy?

where do we come from?

what is its fate?

how old is the universe?

the questions never end here

Sunday
13 Sept. 2015

Time- 10am-12pm

Venue- Training room, 100 NCL Innovation Park, Dr. Homi Bhabha Road,
Pashan-411008

Astronomy is the science that takes us to the roots of our origin.
Come lets explore this field which is full of surprises !!!

Brief Bio of our speakers

Shweta Kulkarni

Is the founder of Astron and has completed the university certificate course in astronomy and cosmology from University of Central Lancashire, UK. Also, completing basic degree in astronomy from the same university. Shweta has also completed few short online courses about astronomy from The University of Tokyo and The Curtin University.

Nimish Aage

Is highly fascinated by astronomy and looks after the management of Astron. Currently in the final year of Ferguson college's Physics-Photography dual degree course. Has done various online certificate courses from renowned universities, such as, Caltech, Edinburgh, Copenhagen.

Astron is an organisation lead by by young amateur astronomers who look forward to dedicate their career to astronomy. Astron is founded in 2011 and is primarily working for the spread of knowledge of astronomy among the public to make their own contribution as far as possible. It has been actively working on the propagation of astronomy in purely scientific temperament.

So far, Astron has conducted more than 25 events and activities related to astronomy.
