About the speaker:

The program is conducted by **Mr. Chenthil R Iyer** who has spent the last 12 years in the financial services industry and has gained in depth understanding of money and how decisions related to money impact individuals. He has been building his financial planning practice over the last 8 years and has also spent close to 8 years teaching financial planning to aspiring financial planning practitioners. He is very passionate about sharing his knowledge and experience with others, especially children as the current education system does not expose them to the concept of money in detail and therefore doesn't enable them to make good financial decisions later in life.
