We will be discussing the book 'Thank you for being late' by Thomas Friedman. It will be a Group Discussion on the book topics.

### Short introduction of the book

Thomas Friedman exposes the tectonic movements that are reshaping the world today and explains how to get the most out of them. It is a work of contemporary history that serves as field manual for how to think about this era of accelerations. It is also an argument for 'being late' - for pausing to appreciate this amazing historical epoch we are passing through and reflecting on its possibilities and dangers.
